

# NBA MVPs

By: RCP

# Topic & Motivation

Which qualities are the best predictors of MVP status in the 1997-2022 seasons?

# Data Introduction

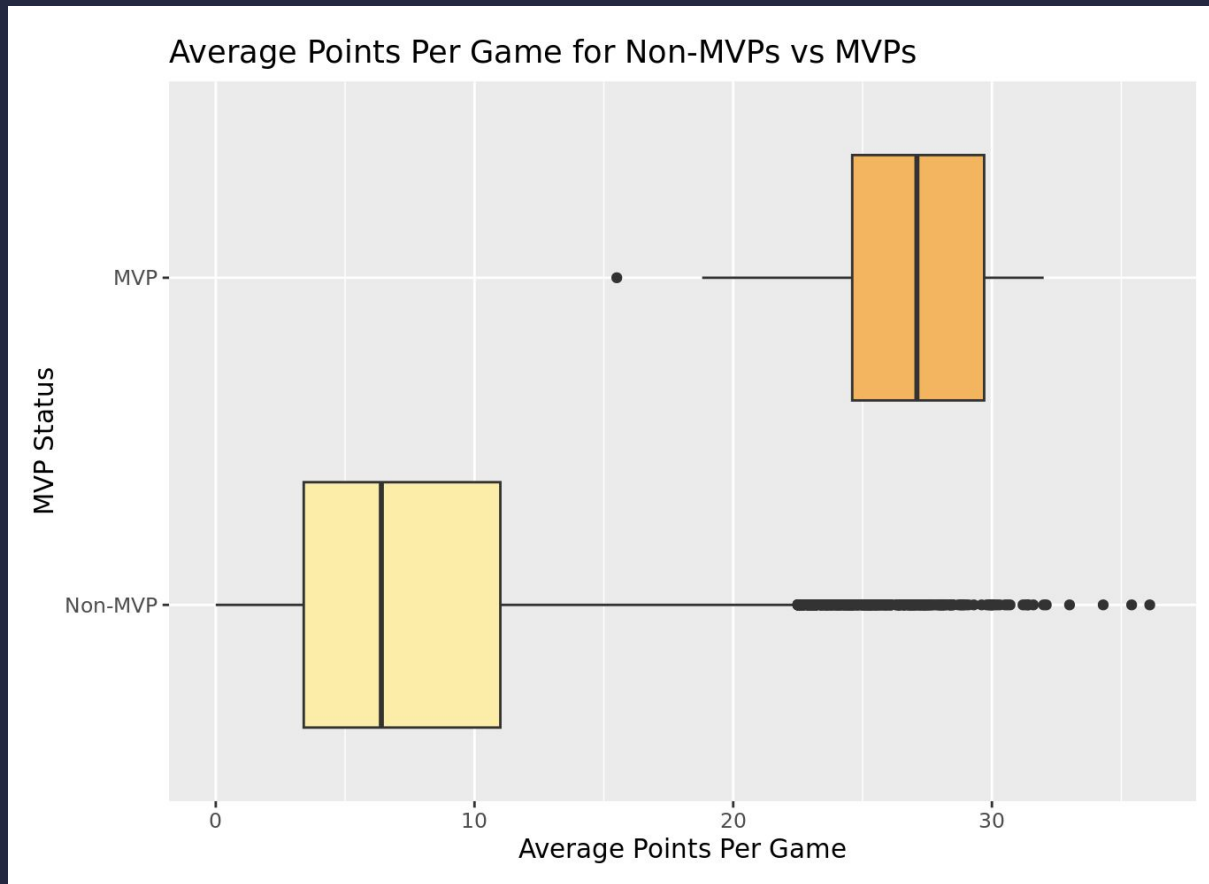

- Basketball Reference website
- Seasons between 1997-2022
- Categorical variables
  - Season
  - MVP Status
- Quantitative Variables
  - Points
  - Steals
  - Defensive Rebounds
  - Offensive Rebounds

# Exploratory Data Analysis

MVP Status	Number of Observations	Percent
FALSE	14548	99.8284499
TRUE	25	0.1715501

# Assessing the Model's Ability to Predict MVPs

Prediction	FALSE	TRUE
FALSE -	35	5
TRUE -	4	1
Truth		

# Conclusions

- In terms of our hypothesis...
  - Three Pointers Per Game is not one of the best MVP predictors
  - Best predictors were in offensive positions
- Scope, limitations, and looking forward...
  - MVP values are always changing
  - Data set imbalance limits performance
